ACTIVE INGREDIENT
Streptomyces rochei (CBCC 3060)

FORMULATION
Liquid and powder form

CROPS
All crop varieties

PACKAGING
1 litre
500 ml
250 ml

CROPNOVA™

The extracts in CROPNOVA™ produced by the microbe alters the ion permeability causing hyper-polarization leading to death of the insect.

Among all the sucking pests it was observed to impact the thrips population the most, and to some extent the mites and other sucking pest population.
