ACTIVE INGREDIENT
Vesicular Arbuscular Mycorrhiza

FORMULATION
Water Soluble Gel (GW)

CROPS
All crop varieties

PACKAGING
10 gm
5 gm

DILJIT-GEL™

DILJIT-GEL™ is enriched with Mycorrhiza, a bio-component to enhance both plant growth and root development.

A small 10g dose of DILJIT-GEL™ is equivalent to 10kg of a traditional soil based product.

In Indian agronomic conditions, 0.8million of Infective propagules (IP) per hectare is sufficient for good plant growth, but DILJIT-GEL™ has counts of 1-1.2million IPs in 10g.

Dose: 10g per ha
