CROPBASE
Bio-Fungicide

Product Description:
CROPBASE is another non-phytotoxic formulation that provides for an effective seed treatment, protecting the roots and ensuring better plant growth.

Crop Recommendations: CROPBASE is recommended against soil borne fungal wilts, Fusarium, Puthium, Rhizoctonia, Sclerotonium, Ralstonia etc.

Recommended dosage: 5 - 10 ml/litre (based on disease severity)

DIRECTIONS FOR USE

Drenching:
- Dissolve 5 to 10 ml of CROPBASE per litre of water and drench the plant near the root zone.
- Recommended second application after 7-8 days.
- Further application based on disease severity.
- Recommend to use in the initial stage of disease.

Note: Shake well before use
