CROPJASTAA
Bio-chelate of Zinc

Product description:
CROPJASTAA is a unique Bio-Zinc water soluble tablet (bio-chelate of Zinc) - achieved through a proprietary fermentation process. Zinc is a vital trace element in crop nutrition, very crucial in plant growth and development. Zn is required in various enzymatic reactions, metabolic processes and nitrogen metabolism, energy transfer and protein synthesis. Zinc deficiency might result in significant reduction in crop yields and quality.

CROPJASTAA helps to treat all kinds of Zinc deficiencies and help in better plant growth and development.

Recommended dosage:
Foliar Spray: 5 tablets per acre
(each tablet weighs 15grams, so, 75 grams per acre)

DIRECTIONS FOR USE
- Dissolve 5 (five) CROPJASTAA tablets in 150 to 200 litres of water and spray the crop thoroughly.
- Based on level of deficiency - further usage is recommended.
