Product description:
The extracts of the microbe in CROP MB - disrupts the insect’s mid-gut membranes. Thus killing the insect within 48 hours of contact.

Pest Recommendations: Effective against early instars (1st and 2nd) of mealy bugs (pseudococcids) and leaf miner (Liriomyzasps, Tutaabsoluta)

DIRECTIONS FOR USE

For Outdoor/Field Test
- Mix 3-5 ml of CROP MB per litre of water in a container.
- Drench around the plant rhizosphere.
- Ensure presence of sufficient moisture before treatment.
- Observe for insect mortality from 2 to 3 days of treatment.
