CROPRADE
Bio-Insecticide

Product description:
The extracts of *Streptomyces* in CROPRADE, triggers the gut cells to start compulsive reverse hydrolysis and drain the *haemolymph* leading to death of the insect.

Pest Recommendations: Effective against early nymphal instars (1\textsuperscript{st} and 2\textsuperscript{nd}) of white flies, aphids and jassids

DIRECTIONS FOR USE

For Outdoor/Field Test
- Mix 2 ml of CROPRADE per litre of water in a container.
- Drench around the plant rhizosphere.
- Ensure presence of sufficient moisture before treatment.
- Observe for insect mortality from 6-8 days of treatment.
